TELERRADIOLOGY WITH DCVR IMAGING

Dogs and Cats Veterinary Referral has a teleradiology service led by our board certified radiologist, Dr. Sarah Tibbs.

Our teleradiology service creates an extension of your existing practice as you submit radiographs and patient information for review and receive a radiology report allowing you to incorporate specialist level care into every case. Reports typically will be sent the same day as the case is submitted. Phone consultation with the radiologist is also readily available. Should you need images reviewed on an urgent basis, we encourage you to call our radiology department at (301)809-8800 for assistance.

Images can be submitted in the following ways:

DVM insight

<http://dvminsight.com/>

Preferred: this method allows submission of history and facilitates communication via DVM insight's off site server and data handling abilities. This must be set up by DVM insight.

EMAIL (DICOM or JPEG format)

radiology@dcvetreferral.com

CONVENTIONAL (CD, Films, mail, drop-off)

Dogs and Cats Veterinary Referral
6700 Laurel Bowie Rd Bowie, MD 20715

IF NOT USING DVM INSIGHT

Please also submit teleradiology request form via EMAIL or FAX
